

Cable: Tellurium Q Blue II

\$250/m - interconnect
\$25/m - speaker cable
Telluriumq.com

When the discussion turns to cable, (and it always does) too many audio enthusiasts think that premium cable will cost more than a new car. While it can, it doesn't have to.

We've been using Tellurium Q's original Blue as our go to cable in modest and vintage systems to excellent result for some time now, and the new, improved Blue II is better in every way. Fantastic.
